

# Stomach Comfort

DIN 02247782, 60 Tablets, Digestive supplement, Stock No. 1820-0

**S**tomach Comfort is an antacid formulation that provides natural ingredients to help nutritionally support digestion in times of stomach discomfort. It contains calcium carbonate (neutralizes stomach acid), alginic acid (from kelp; protects the mucus lining of the esophagus from irritation), wintergreen oil, papaya fruit (aids digestion), slippery elm bark (soothes the digestive tract), licorice root concentrate (aids digestion) and ginger (promotes digestion). Stomach Comfort may help normal body processes in soothing a burning sensation in the stomach or an uncomfortable acidic taste in the throat or mouth. Chew 2 tablets when quick, temporary digestive support is needed. Can also be used for pH balancing. Chew 1–2 tablets between meals for pH balancing.

## *Did you know?*

Calcium carbonate is a proven stomach acid neutralizer. Its inclusion in the formulation makes Stomach Comfort particularly useful in over-acid conditions and acid indigestion. The formula also includes alginic acid from kelp. Despite its name it is not particularly acidic. It actually protects the mucus lining of

the esophagus from irritation. This makes Stomach Comfort helpful in dealing with people who have GERD, or Gastro-Esophageal Reflux Disease. This particular condition happens when the some of the stomach's contents make their way back up the esophagus. Since the esophagus is not equipped to handle the acidic nature of stomach contents, a great deal of pain and discomfort can result.

## *NSP Advantage*

60 tablets. Antacid formula with supporting herbs.

*Ingredients:* Calcium carbonate 760 mg, alginic acid 80 mg.

*Other Ingredients:* Xylitol, caseinate powder, fructose, papaya (*Carica papaya*) fruit, stearic acid, guar (*Cyamaposus tetragonolobus*) gum, slippery elm (*Ulmus fulva*) bark, magnesium stearate, natural- sourced flavours, ginger (*Zingiber officinale*) rhizome, licorice (*Glycyrrhiza glabra*) root.

*Recommendation:* For Adult Use: For the relief of heartburn associated with acid indigestion or stomach acid reflux, chew two tablets as needed.

## Features & Benefits

- Pleasant-tasting chewable tablet.
- Provides relief of heartburn.
- Contains herbs that soothe mucus membranes and support normal digestive processes.
- Ginger helps relieve digestive upsets/disturbances including flatulence, spasmodic indigestion and constipation. Ginger has been used traditionally as a spasmolytic (anti-spasmodic).
- In Chinese medicine, licorice is used for many ailments, including abdominal pain and ulcers.
- Several studies have shown anti-ulcer effects of various components in licorice.
