

E-Tea

100 capsules, Herbal combination, Stock No. 1360-4

E-Tea is formulated according to the Essiac tea formula. Named after Rene Caisse (Caisse spelled backwards), this combination is actually an herbal remedy given to her by the Ojibwa Indians.

E-Tea consists of concentrated extracts of four common herbs which, combined and acting synergistically, work to inhibit and potentially destroy benign growths and tumours.

Did you know?

In 1922, Rene Caisse, a Canadian nurse, made a discovery that would change her life and the course of cancer therapy. Caisse received the formula for an herbal remedy through a patient who had been successfully treated for breast cancer by a Native American medicine man. With this remedy, which she called Essiac, Caisse would go on to treat thousands of patients at an incredible recovery rate of 80% (*Essiac, A Native Herbal Cancer Remedy* by Cynthia Olsen).

NSP Advantage

100 capsules. Herbal Combination.

E-Tea is a convenient pre-steeped concentrate that removes the 10-hour traditional method of preparation. Needs no refrigeration.

Ingredients: 430 mg of Essiac Tea Blend: (burdock root [*Arctium lappa*], sheep sorrel herb [*Rumex acetosella*], slippery elm [*Ulmus rubra*] bark, Turkey rhubarb [*Rheum officinale*] root, maltodextrin, dextrin).

Recommendation: Take two capsules with a meal three times daily. The contents of the capsules can be added to 4 ounces of hot water to drink as a tea, or the capsules can be swallowed.

Features & Benefits

- Traditional formula that has been used extensively with all types of cancer. In more recent times, Essiac has been used in the treatment of AIDS, chronic acne, leukemia, liver problems, multiple sclerosis, thyroid disorders, viruses, and numerous degenerative diseases.
